NOTES

[USSR: Soyuz 4, with its crew of three, returned safely to the Soviet Union early this morning, TASS announced. Soyuz 5 remains in orbit. The next opportunity for recovering it occurs early tomorrow morning. The Soviets probably fulfilled the major goals for this mission--the docking of two manned spacecraft and the transfer of two crewmen from Soyuz 5 to Soyuz 4. These accomplishments represent important developments in proving some of the hardware and techniques required for space rescue and for orbiting and maintaining manned space stations.
